IJPEAES publishes original papers, review papers, conceptual framework, analytical and simulation models, case studies, empirical research, technical notes, and book reviews.

### Peer Review Process

IJPEAES uses double-blind system: the reviewers' identities remain anonymous to authors. The paper will be peer-reviewed by three experts; one is editor-in-chief and the other two are internal editors and external reviewers.

### Ethical Guidelines for Authors

**Fabrication/ Falsification of Data:** Making up data or results and recording or reporting them is fabrication of data. Falsification of data is manipulating research materials, omitting/deletion/suppression of conflicting data without justification and this would cause mistrust and disgrace to scientific community.

**Plagiarism:** Using another person's ideas, language, graphs, pictures, results and experiments without giving credit to them. Without citing the source, copying even a single sentence from your own or another person's research paper led to plagiarism.

**Unacceptable Author Contribution:** Including authors who have not contributed to the research in the manuscript and excluding authors who have contributed to the research is unacceptable author contribution.

**Citation Manipulation:** Citing irrelevant articles that don't contribute to content of manuscript is a kind of scientific misconduct.

**Concurrent Submissions:** It is submitting the same manuscript to more than one journal at the same time. It is a waste of time of editors and peer reviewers, and can also damage the reputation of journals if published in more than place.

**Redundant Publications:** It primarily refers to publishing the same material/experiments more than once. Accountability-All authors whose names appear on the manuscript are equally held accountable for the content of a submitted manuscript or published paper.

### Ethical Responsibility for Peer Review/ the Reviewers

As an editor or a reviewer you are requested to find out about the originality of the manuscript you are urged to review. Therefore, it is recommended that you also see the Author Guidelines and Policies page so that authors should take into consideration prior to submission of their papers for the publication.

Although reviewed articles are treated confidentially, reviewers' judgments should be objective. Reviewers should have no conflict of interest with respect to the research, the authors and/or the research funders, and reviewers should point out relevant published work which is not yet cited.

### Ethical Guidelines for Editors-in-Chief/ Editorial Board Member

The Editor-in-Chief makes the final decision to publish the manuscript in the journal based on peer-reviewers comments. It is expected that Editors during the review process should be principled, prompt, act with confidence, contribution to the final decision, acknowledge source, and stick to objectives and guidelines mentioned below:

- Editors should understand that the peer review process is confidential. The review process should not be shared with anyone outside the peer review process.
- Editors clearly understand that review process should be unbiased and author deserves full credit for their work.
- Editor-in-Chief should discuss all matter regarding publication with the Editorial board members before making a final decision.
- Editors should automatically reject manuscript that are inappropriate or out of scope of the journal.

Editors must investigate if they receive information that a manuscript is plagiarized, under consideration elsewhere or has already been published. If there is evidence that the manuscript has been plagiarized, under consideration elsewhere or has already been published, then the Editor-in-Chief should issue an erratum.

### Prohibited Author's List (PAL)

If there is a violation of any of the above said policies in the IJPEAES, the manuscript will be rejected or removed. The author will be entered in the PAL database and prohibited to contribute for the next 3 years.
